

iD campus

From regulation to real-world
digital identity deployment

The new hub for digital identity

Driven by:

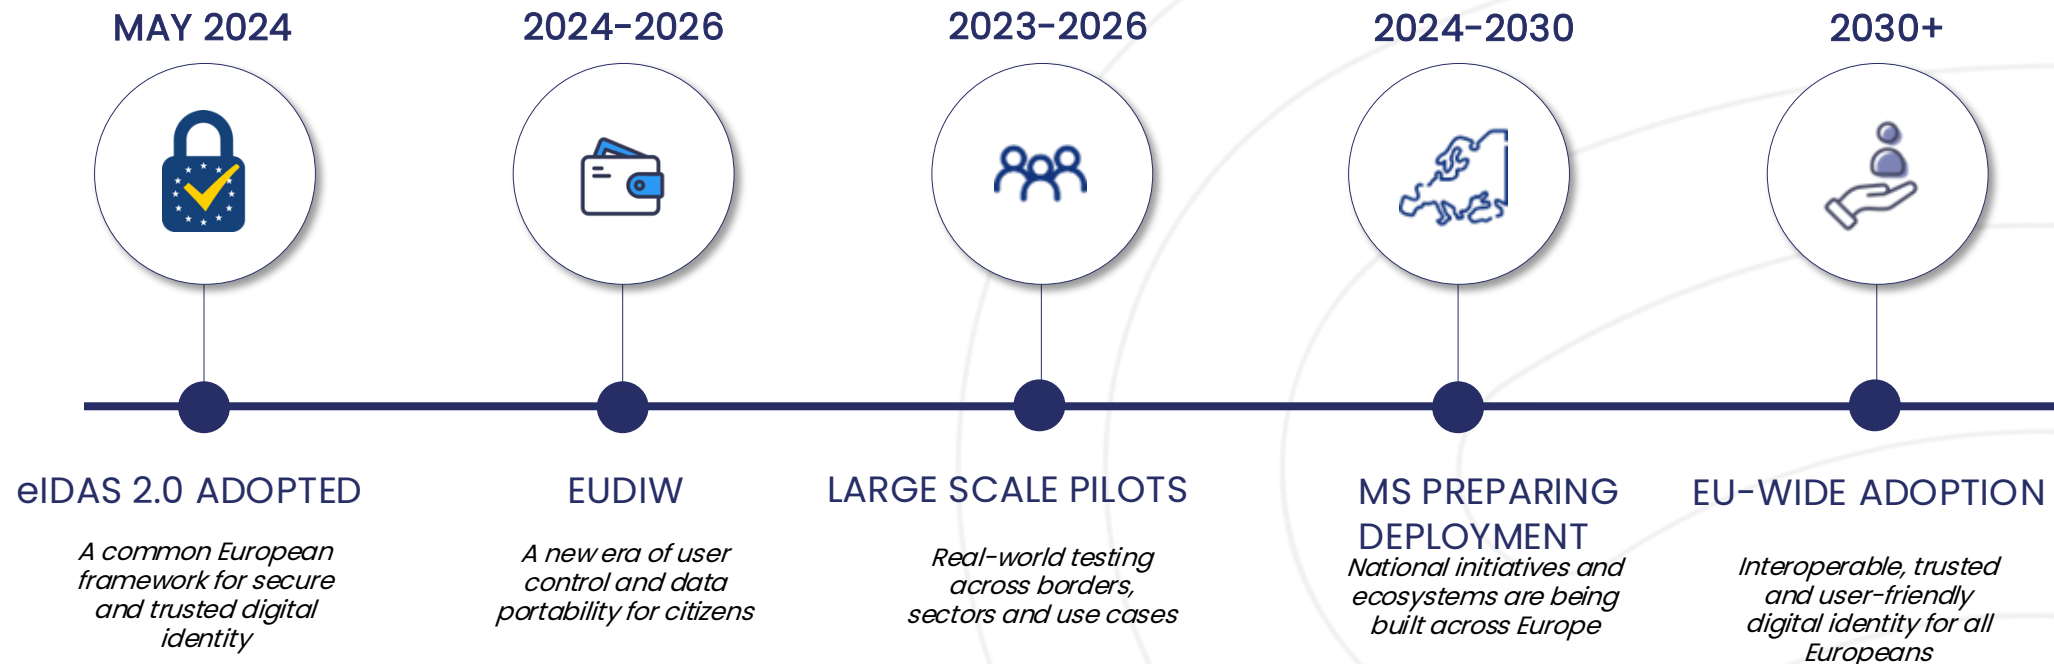

In partnership with:

Presented for:

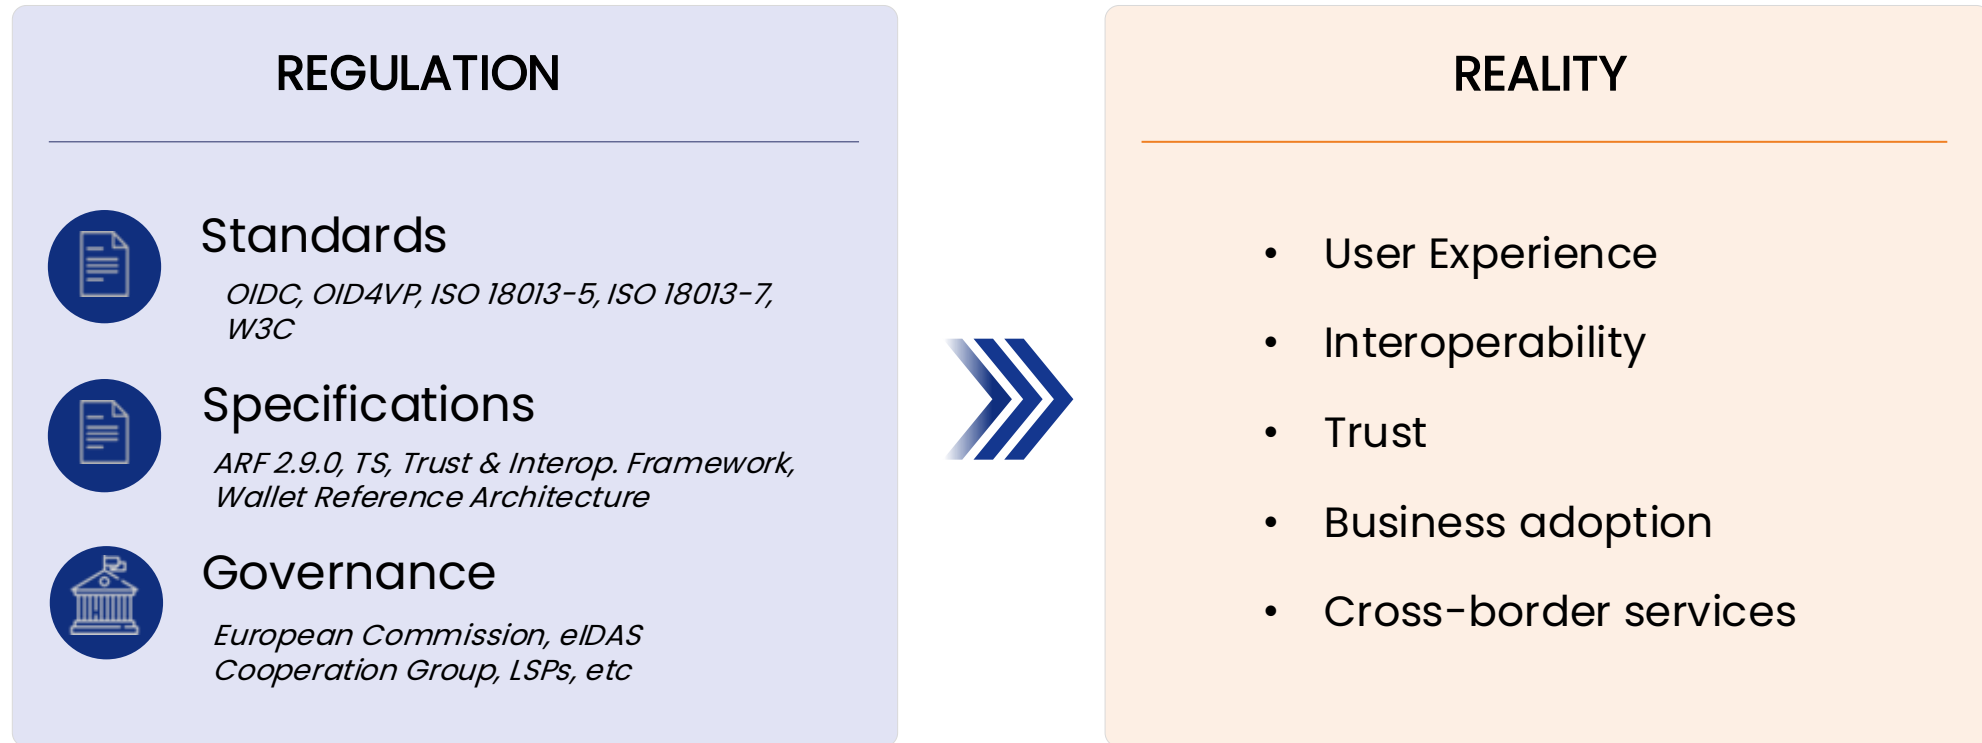

1. The European momentum

Europe has moved beyond the question of « if » digital identity will happen.
The challenge is now « **how** » to deploy it at scale.

2. The deployment challenge

The missing piece is **real-life experimentation**

There is a need of real users, real conditions, to bridge the gap between regulation and operational reality.

3. Creation of ID Campus

A unique physical place
for digital identity
experimentation

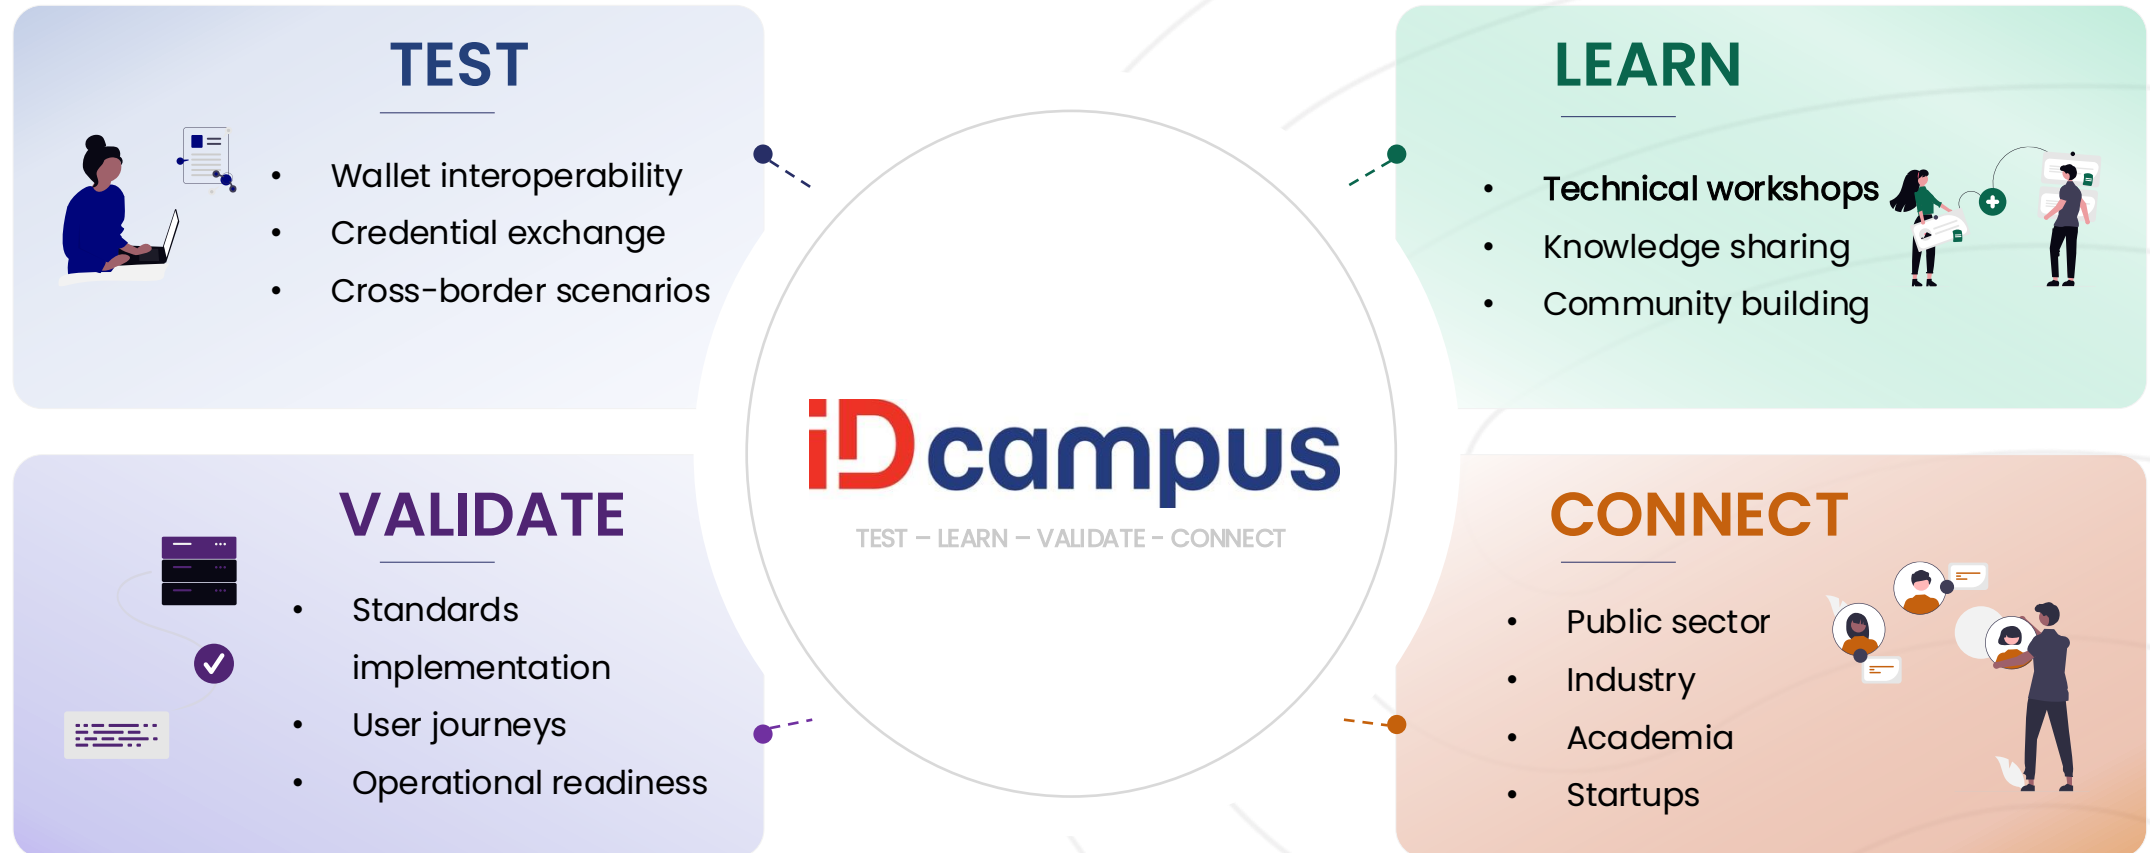

In January 2026, iDAKTO launched, in partnership with France Titres, a center dedicated to the design, testing, and deployment of use cases for the EUDI Wallet.

IDCampus missions

- **Test and validate** EUDIW use cases in real-world environments
- Ensure **interoperability** across ecosystems, providers, and countries
- **Accelerate adoption** through research, collaboration, and innovation programs

4. What truly happens at ID Campus?

5. The power of onsite experimentations

POSSIBLE ON-SITE EXPERIMENTATIONS FACILITATION

Campus & physical access

- Student credential issuance and validation
- Access to buildings, libraries, labs and facilities
- Printing, canteen and campus services

Proximity & device interactions

- NFC / QR code based presentations
- Bluetooth proximity interactions
- Secure device-to-device data sharing

Transactions & real-world services

- In-person identity proofing and verification
- Secure payments and loyalty scenarios
- Ticketing and access to events or transport

ID Campus enables real-world testing that requires **proximity, interaction and trust**.

Public and private actors experiment together.

BEYOND WALLETS: THE FULL IDENTITY LANDSCAPE

IAM & CIAM

Identity & access management solutions and federation

AGENTIC AI

Exploring agentic identity, consent management and automated trust

TRUST & CREDENTIALS

Verifiable credentials, attribute management and trust frameworks

PRIVACY & SECURITY

Privacy enhancing technologies and security evaluations

ID Campus is your playground to explore, challenge and build the next generation of identity solutions.

Work together

Test in real life

Validate solutions

Innovate faster

6. Community momentum

PASSED EVENTS

ID Campus Inauguration
February 2026

Planification workshop
May 2026

EUDIW Interop. Tests
April 2026

UPCOMING EVENTS

June 2026
Planification workshop V2

June 2026
French Tech event

August 2026
'Summer Camp'
TBC

September 2026
French Tech event

December 2026
Trustech event

Join the iDcampus community !

TEST WITH PARTNERS

*Validate your solutions in
real conditions*

ORGANIZE A WORKSHOP

*Bring your teams and
ecosystem partners
together*

BUILD NEW USE CASES

*Collaborate on future digital
identity services*

+80 partners already within the initiatives

Let's CONNECT!
